

Soufiane El gharbaoui

Full-Stack JS Developer

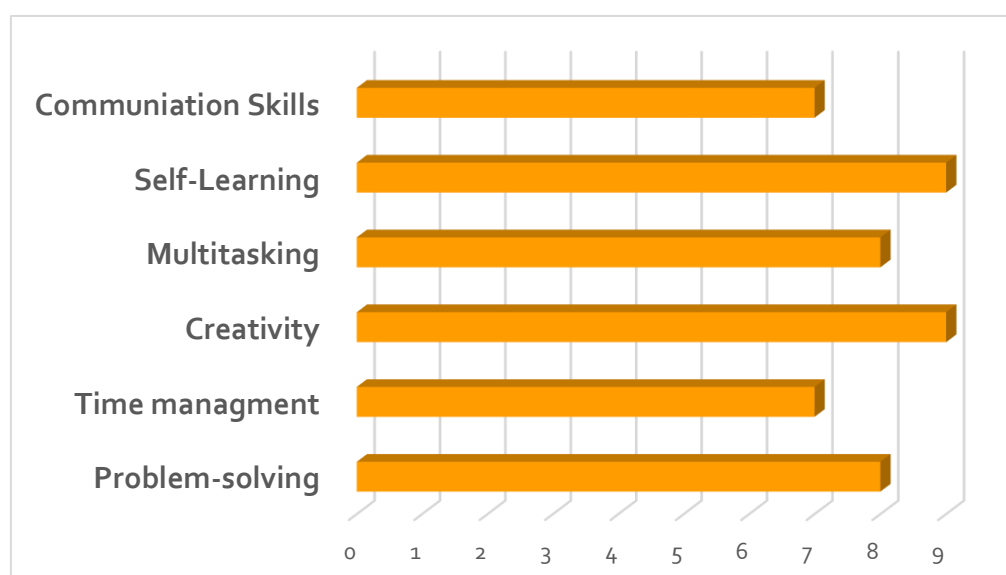

Profile:

I am a talented full-stack JS developer with expertise in MERN technology. I can bring a strong skill set and attention to detail to every project, delivering top-quality solutions that meet client needs and exceed expectations.

Soft skills:

Hard skills:

Languages:

- Arabic => Native
- English => Intermediate

Education & Certifications:

- 2021 - current Fes City
Bachelor degree
USMBA, English Department

- 2021 -2022 Online
HTML5, CSS3, JS (ES6)

I started learning the essentials of programming through Osama El zero's YouTube channel, after that I did several responsive projects using HTML, CSS, JS to boost my knowledge. Finally, I explored that there are many CSS preprocessors like SCSS, as well as libraries that might be used to take the app to the next level.

- 2022 - 2022/5 Online
Node.js, Express, MongoDB

During that time, I focused on learning Node.js and their relative libraries such as Express, *Multer*, *Express-async-errors*, *Nodemailer...*; then *mongoose.js* to interact with MongoDB.

- 2022/6 - 2022/8 Online
React.js, Redux.js

I started with learning React.js library from its official docs with the help of multiple tutors to boost my knowledge and move forward in my Front-end applications; then I learnt Redux.js to make it easier for me to control the app state, also Redux-Persist to avoid losing the client data, in addition to React-Router-Dom to navigate between the application pages. At the end, I put all my knowledge in multiple applications such as this **social media** application.

Work experience:

- 2022/9 - current Online
Freelancer at Upwork and other freelancing platforms.

Projects:

✓ My Portfolio:

This is my Responsive/Impressive portfolio that was created using HTML5, CSS3, JS, and jQuery.

✓ Social media platform:

This is a full-stack app created by using some of the most modern technologies which are React, NodeJS, Express, and MongoDB; in addition to multiple useful libraries.

✓ E-shop:

A responsive e-commerce website that was one of my projects that led me to reveal the true nature of CSS3, and JS. And that happened when I faced several problems while creating it such as complex-filtering products, and hand-coding carousel.

✓ Kasper:

A long landing page that I have created using HTML5, CSS3, and JS.
